

Calgary Water for Life Gala

A Decade of Impact

Thanks to your generosity over the past decade, we've supported life-changing water initiatives that are helping thousands of children around the world to live and grow up healthy.

2010 – Guatemala

\$677,100 helped reduce chronic malnutrition among 44,000 children in Totonicapán, Guatemala where more than 70 per cent of children under 5 years of age were affected.

2011 – Democratic Republic of the Congo

\$770,000 supported 24,000 people living in 19 remote villages in the Democratic Republic of the Congo, to gain improved access to safe drinking water and live in a cholera-free environment.

2014 – Cambodia

\$965,000 provided 10 pre-schools in a remote province with water, sanitation and hygiene facilities, benefitting 22,000 people.

2013 – Syria and South Sudan

\$885,000 enabled water, sanitation and hygiene programs in the complex emergencies of Syria and South Sudan. This contributed to water purification for over 16 million people across Syria; and water chlorination and waste management to reduce the number of cholera cases in South Sudan.

2012 – Namibia

\$845,000 was raised to create safe, clean school environments that help improve learning outcomes. This project benefitted 22,500 students in 45 schools, as well as providing 34 water tanks, 8,000 jerry cans, and water purification tablets for 9,000 families.

2015 - Ghana

\$968,000 supported water facilities in 21 health centres in Ghana, creating sanitary conditions for healthcare workers and reducing maternal and newborn deaths.

2016 – Chad and Mongolia

\$919,000 helped construct boreholes and install water pumps in Chad, bringing clean water to schools, health centres and communities. We also supported water resilience measures in the hardest to reach areas of Mongolia, ensuring access to safe drinking water for 20,000 school children.

2017-2019 – Uganda

\$3,489,765 has supported our UNdaunted campaign, equipping 40 schools with boreholes and water systems, and training 550 schools, students and staff in menstrual hygiene management. Together, we're reaching 210,000 girls, giving them the support they need to stay in school.
